

EZReader Links

The EZTaskbar and EZCenterbar can display up to 10 URL icons. The URLs associated with each icon can be a web site or a local Windows application.

When clicked, the URL icons will open the user's default browser to the web site chosen for the icon. If the URL is an application, it opens in its own window.

The icon for each link displays a letter chosen by the user to represent the link, as shown in this image.

By default the letters are as shown in the above image and correspond to the following web sites or applications:

The first five URLs must be a web site address.

- **G** - Google
- **Y** - YouTube
- **F** - FaceBook
- **A** - Amazon
- **N** - WikiPedia

The next five URLs may be web site or Windows applications:

- **W** - MS Office Word
- **P** - Windows WordPad
- **N** - NotePad
- **H** - EZReader Change History
- **E** - EZReader Home Page

The URLs and letter to display can be changed by the user by with the EZReader Settings application.
